SMART RESTROOM CLEANLINESS MANAGEMENT SOLUTION

An IoT Product

PEOPLE COUNT

ALERT SYSTEM

CLEANER ATTENDANCE

INCREASE PRODUCIVITY

AMMONIA SENSORS

CENTRALISED REPORTS

ZERO MAINTAINENCE

GAIN INSIGHT

- System equipped with advance Ammonia Sensor along with drawing fan to give accurate readings
- System gives realtime information on number of users, time of cleaning , sms incase the limit goes beyond threshold limit.
- People sensor IR based along with density sensor helps in knowing the usability of rest room.
- Mobile based attendance / RFID based attendance as well as alert solution for the cleaning agent to be alerted apart from central attendance.
- A web / cloud based application that provides complete insight to the working of rest rooms.
- Solution independently fitted in multi room installation with WiFi / GSM interface.
- Ammonia sensor fitted near urinals and pots. Bluetooth connectivity for wet floor sensor to alert the system.
- Mimic Based 5 button feedback mentioning about Cleanliness , Wet Floor , Pot Needs to be cleaned, water not in Toilet, and Happiness Index. Complete with IP67 for rough use.
- Is smart city compatible in form of database etc. We offer free Mobile App to every user. Google Map integrated for realtime updates.
